

# ROPPE.

Proven. Flooring. Experiences.

## When extraordinary performance is required, Roppe protects against flooring failure.

Proven to withstand 1500 PSI, Envire® Rubber Flooring holds up to heavy equipment, high traffic and abuse—and doesn't fail.

### **A hero in healthcare, and other demanding environments.**

Envire is ideal in applications where flooring needs to stand up to heavy loads, such as machinery, bed/patient transport and wheelchairs, and continual foot traffic. It not only quickly recovers from indentations but provides comfort, too. Plus, fewer seams and a low profile allow for easy, fast cleaning and disinfection, supporting high hygienic standards. In addition to healthcare, Envire is ideal for use in classrooms, municipal and government buildings and research labs.

Extraordinary environments are what Envire is made for—day in, day out, every day, all day—to help you meet the challenges of your extraordinary spaces.

sheet & tile are available in a smooth profile only
